

Mustang Math Tournament 2024

Mounting Mayhem Answers

Warning: Some pigs may have turned into sheeps.

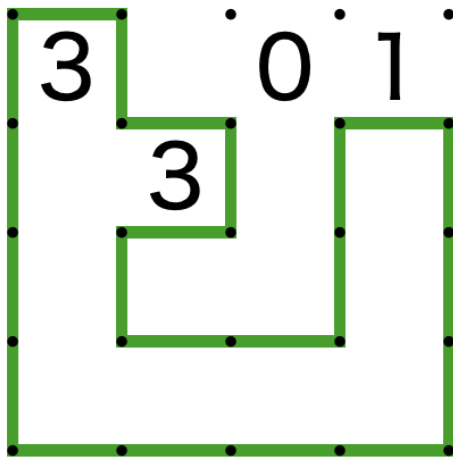

Grading Instructions:

- A puzzle is correct if and only if all drawn lines match that of the solutions (no missing lines nor extraneous lines). Ignore any x's, shading, or extraneous lines with clear erasing attempts.
- If a submission does not align with our solution but forms a single complete loop, identify where the mistake occurs and mark it with an arrow. If you can't identify where the puzzle is wrong, show a head grader.
- Mark a 1 or 0 for correct or incorrect, respectively, in the grading box next to the puzzles on the student answer sheets.
- Copy down the 1s and 0s into the table on the front page of the student answer sheets, ensure that both graders agree on grading.
